(Specify)

02 SUMMARY OF KNOWN PROBLEMS (Provide narrative description)

On July 14, 1993 waste oil was discovered seeping into Metropolitan Sewer District pump station. Laboratory confirmed oil contained PCB's of less than 50 ppm.

03 SUMMARY OF ALLEGED OR POTENTIAL PROBLEMS (Provide narrative description)

Alleged that Union Electric Company once owned a building that was used to store old transformers. This building was located approximately 400 feet southwest of MSD pump station adjacent to Mound Street. Basement of this former building was said to be full of waste oil when demolished.
